

COBIT 5 Foundation

Duration: 3 days

The COBIT® 5 Essentials course is a 3-day, interactive, classroom-based learning experience. Participants learn about the need for an IT governance framework and how COBIT addresses this need by providing the latest thinking in enterprise-wide governance of IT. This course explains the elements and supporting materials of the COBIT framework using a logical and example-driven approach for everyone interested in obtaining Foundation-level knowledge of COBIT.

About COBIT:

COBIT 5 provides the next generation of ISACA's guidance on the enterprise governance and management of IT. It builds on more than 15 years of practical usage and application of COBIT by many enterprises and Users from business, IT, risk, security and assurance communities.

Today, more than ever, information and related technologies need to be governed, managed and operated in a holistic manner with a single, integrated process model that provides end-to-end Coverage of the roles, responsibilities and practices required.

COBIT 5 provides a comprehensive framework that assists enterprises in achieving their objectives for the governance and management of enterprise IT. It helps enterprises create optimal value from IT by maintaining a balance between realizing benefits and optimizing risk levels and resource use. COBIT 5 enables IT to be governed and managed in a holistic manner for the entire enterprise, taking in the full end-to-end business and IT functional areas of responsibility, considering the IT-related interests of internal and external stakeholders. COBIT 5 is generic and useful for enterprises of all sizes, whether commercial, not-for-profit or in the public sector.
