

Certified in Risk and Information Systems Control (CRISC®)

Duration 3 Days

COURSE OVERVIEW

Propel your career with CRISC certification and build greater understanding of the impact of IT risk and how it relates to your organisation.

CRISC is now one of the most highly sought-after qualifications. It is the only certification that prepares and enables IT professionals for the unique challenges of IT and enterprise risk management, and positions them to become strategic partners to the enterprise.

Established in 2010, it has already been earned by nearly 17,000 professionals worldwide and was named Gold Winner for Best Professional Certification Program at the SC Magazine 2013 Awards.

This three day CRISC course has been designed to comprehensively cover the full CRISC syllabus and to prepare you for a first-time pass in the CRISC exam.

LEARNING OUTCOME

For organisations, employing CRISC professionals brings great benefits such as:
build greater understanding about the impact of it risk and how it relates to the overall organization;
assure development of more effective plans to mitigate risk; & establish a common perspective and language about it risk that can set the standard for the enterprise

With a growing demand for professionals with risk and control skills, it is a great time to gain a globally recognised certification in this field. Becoming CRISC certified will:

- Demonstrate your knowledge and expertise in risk management.
- Increase your value within your organisation.
- Provide a gateway to more strategic level roles.
- Maintain your high level of professionalism through continuing professional education.
