

ITIL® 4 Specialist: Plan, Implement and Control (ITIL4 PIC)

Duration: 3 days | The exam voucher is included in the training's price.

COURSE DESCRIPTION

The ITIL4 Plan, Implement and Control course is designed to equip IT professionals with the knowledge and skills required to effectively plan, implement and control IT services in alignment with the ITIL4 framework. This course builds upon the foundational concepts of ITIL4 and aims to establish good cross-practice collaboration and effective service value streams in support of business objectives

Participants will explore the key principles and practices of ITIL4 in the context of planning, implementing and controlling IT services. Participants will gain deeper insights into change enablement, service configuration management, IT asset management, release management and deployment management practices with best practice guidance (centered around the four dimensions of service management) at both strategic, tactical and operational levels to maximize value from the ITIL4 practices.

By the end of this course, participants will possess a comprehensive understanding of ITIL4 principles and practices related to planning, implementing and controlling IT services. The course also includes guidance to measure practice capability levels and understand factors that correlate with practice success.

COURSE OBJECTIVE

On completion of this course, the following learning outcomes will be achieved:

- Define the key concepts, principles, value and challenges of ITIL 4's five Plan, Implement and Control management practices
- Ensure stakeholders understand the strategic and operational requirements to co-create value and achieve business goals
- Integrate the practices in the organization's value streams
- Understand the interfaces and synergies across these five practices
- Apply metrics and practice success factors to improve performance
- Measure, assess and develop the capability of the various practices covered by using the ITIL Maturity Model

COURSE OUTLINE

Module1: IT Asset Management Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
