

ITIL Foundation (Version 5)

Duration: 3 days | The exam voucher is included in the training's price.

COURSE DESCRIPTION

ITIL® Certification (Version 5) introduces the core concepts of modern digital product and service management. It explains how organisations create value through service offerings, service relationships, and value co-creation, while applying structured lifecycle activities and governance principles.

This instructor-led training builds a clear understanding of the ITIL Value System, the Four Dimensions of Product and Service Management, value streams, and continual improvement. It also highlights the role of emerging practices such as AI governance and alignment with frameworks like DevOps and PRINCE2.
