

ITIL Managing Professional Transition (Version 5)

Duration: 6 days

COURSE DESCRIPTION

The ITIL® 5 Managing Professional Transition course is designed to help IT and digital service professionals transition smoothly from ITIL® 4 Managing Professional certifications to the new ITIL® Version 5 framework. The course equips participants with the updated knowledge, practices and strategic capabilities required to manage modern IT-enabled services, digital products and enterprise-wide service relationships in increasingly complex business environments.

Building upon the established ITIL service management framework, this course introduces the enhanced concepts, governance approaches and operational models incorporated within ITIL Version 5. Participants will gain a comprehensive understanding of how Version 5 strengthens organisational agility, resilience, service value delivery and customer-centric operations while integrating emerging technologies and modern ways of working.

The course explores key areas including service strategy, stakeholder value, governance, digital operating models, service optimisation and continual improvement. Participants will also learn how ITIL Version 5 aligns with Agile, DevOps, Lean, AI-enabled operations and modern enterprise transformation initiatives.

By the end of the course, participants will understand how to apply ITIL Version 5 practices to improve operational efficiency, enhance service experiences, optimise value streams and support sustainable digital transformation initiatives across their organisations.

COURSE OBJECTIVE

- Gain updated expertise in the latest ITIL® Version 5 practices and concepts
- Strengthen your ability to manage modern IT and digital services effectively
- Improve alignment between IT services and business objectives
- Enhance organisational agility, resilience and customer experience
