

ITIL 4 Specialist - High Velocity IT (HVIT)

Duration 4 Days

COURSE DESCRIPTION

The ITIL® Specialist – High Velocity IT (HVIT) course is one of five courses required to achieve ITIL 4's Managing Professional (MP) designation.

As organizations use information and related technologies to do business differently, the ability to rapidly launch new products and services to keep up with the competition becomes critical. To compete in this high-velocity environment, organizations must greatly intensify their agility, speed, cost-effectiveness, and responsiveness.

This four-day course encompasses the ways in which organizations and digital operating models function in high-velocity environments, with a focus on the quick delivery of products and services to gain maximum business value.

This qualification will provide IT practitioners with an understanding of working practices like Agile and Lean, and technical practices and technologies such as cloud, automation, and automatic testing.

COURSE OBJECTIVES

- Understand the concepts regarding the high-velocity nature of the digital enterprise, including the demands it places on IT:
 - Learn when the transformation to high-velocity IT is desirable and feasible
- Understand the digital product life cycle in terms of the ITIL "operating model"
- Understand the importance of the ITIL guiding principles and the other fundamental concepts for delivering high-velocity IT
- Discover how to contribute to achieving value with digital products
 - Learn how the service provider ensures valuable investments are achieved
 - Learn how the service provider ensures fast deployment is achieved
 - Learn how the service provider ensures resilient operations are achieved
 - Learn how the service provider ensures co-created value is achieved
 - Learn how the service provider ensures assured conformance is achieved
